- **Tools** : Azure DevOps, Azure Cloud Services, Webpack, Parcel
- **Other Skills** : Data Structures & Algorithms, System Design (LLD & HLD), Micro Frontends

Experience

Software Development Engineer (Frontend)   Feb 2022 - Present

Jio Platforms Limited   Mumbai

- Solely delivered various applications, Jio **Marketplace** a unified platform connecting service providers & partners, Jio Platforms **5G solutions** designed for CSPs and enterprises, Jio Business **Self Care Portal** to unlock a world of digital experiences for over **40 Million** Users.
- Revamped the whole structure & Improved the Jio WiFi CoE Captive Portal by building a faster React interface, cutting load times by **2 seconds** and making it more accessible.
- Handled primary **On-Call** duties, monitoring production and quickly fixing issues-even during midnight incidents to ensure system stability and uptime.
- As a frontend developer, I took the initiative to learn **Figma**, designed a UX for an uninvited meeting, and successfully pitched it to my boss-who approved and finalized my design.
- Reviewed and merged **100+ pull requests** across 15+ repositories, optimizing CI/CD workflows, and ensuring 99% adherence to code quality standards.
- Led the development of a Jio IoT Services **Connectivity Management Platform**, enhancing Jio Enterprise users or Jio partners at one place to manage their devices/sims.

Projects

NetFlixGPT

🔗 https://netflix-gpt-vikram-kavide-lqzk.vercel.app/

- Designed and developed NetflixGPT, an **AI-driven** platform that enhances the Netflix experience using **OpenAI's GPT-3.5** for personalized movie and TV show recommendations. Integrated **TMDB API** to fetch real-time movie data, ensuring users receive accurate and up-to-date content details, including cast, ratings, and synopsis for detailed content insights.
- Implemented secure authentication with **Firebase**, enabling personalized user sessions and interaction history for a seamless, customized streaming experience.
- Optimized performance with **Redux Toolkit** for efficient state management, **Tailwind CSS** for responsive UI, and memoization techniques to enhance app efficiency.
- Implemented **multilingual** support, ensuring a smooth, localized experience for users worldwide.

Achievements

Awarded & Recognized as the **Star Performer of the Year** for exceeding expectations, setting new performance benchmarks, and consistently raising the bar within the team.
